The test-lane-compatible roller brake tester MBT 3250 EUROSYSYSTEM is designed for the brake testing of cars, vans and light-duty trucks with axle loads of up to 8.0 t and is ideal for vehicle reception and diagnostic lanes. Its standard test speed of 5 km/h complies with the country-specific legal requirements for testing cars and light-duty trucks. As it is possible to connect additional EURO floor units, the brake tester can be used as a base module for the setting up of test lanes.
