# LIFTING TECHNOLOGY SCISSORS LIFT

## **DUO CM 5.0 A** VP 250238

## **DUO CM 5.0 A** VP 250238

The scissors lift DUO CM 5.0 A, for above-floor installation, lifts vehicles of up to 5.0 t and is optimally suited for wheel alignment checks due to its high level of stability. Its robust and well-established construction is designed for maximum service life and high vehicle throughputs. Protected within the lifting cylinders, the integrated maintenance-free displacement measurement sensor (absolute linear measurement system) eliminates the need for light barriers for synchronisation monitoring and electric switches for lift height detection.
