LPS 3000 DESK VP 186010

LPS 3000 DESK VP 186010

The LPS 3000 communication desk has a robust and multifunctional metal housing with an integrated control cabinet to house the electrical components. A lockable drawer for keyboard and PC mouse as well as a storage compartment for other small items is also part of the unit as well as an integrated holder according to VESA standard for holding an all-in-one PC or PC monitor. As an option, it is possible to add side shelves or a PC storage compartment.

PRODUCT DETAILS/ACCESSORIES

Description:
central test stand control system for the LPS3000 product range, used in combination with R100 CAR Series/R200 TRUCK Series roller sets

High level of flexibility in use due to extensive variety of operating modes, covering all fields of application:

- Static power measurement at constant RPM
- Static power measurement at constant speed
- Static power measurement at constant tractive force
- Dynamic power measurement with adjustable acceleration
- MAHA towing power measurement guarantees the highest degree of accuracy when measuring power: Precision calculation of the parasitic losses of the dynamometer, of the vehicle's drive train and the tyre to roller friction and flex losses
- Tachometer testing with up to ten freely selectable test points
- Distance measurement included
- Stopwatch function for measurement of acceleration between optional speed markers as standard
- Optional load simulation with freely programmable load profile
- Optional driving simulation with freely programmable speed profile
- Option of storing programmed profiles in database

Professional, intuitive-use software for the highest expert standards with:

- continuous graphic display and recording of up to 16 freely selectable parameters per performance measurement cycle on one measurement screen
- In addition to the current performance measurement cycle, fade-in of up to three stored cycles on the measurement screen for optimum comparability during calibration work
- Two circular dial displays for RPM and speed as well as current oil temperature display, ensuring constant control of key

- parameters during performance measurement
- Determination of wheel power, power dissipation, engine power and torque
- Standardised extrapolation of motor power in line with DIN 70020, EEC 80/1269, ISO 1585, JIS D 1001 and SAE J 1349 (configuration-dependent)
- Circular dial display of motor power, RPM, speed and tractive force during simulation cycles
- Colour-highlighted user prompts integrated within the circular dial facilitate the accurate reproduction of simulation cycles
- With radio remote control as standard for complete control of the dynamometer from within the vehicle.
- Radio remote control with long-life battery and charging station
- Cooling fan switched on and off either at the control console or with the radio remote control
- Interface box optionally upgradeable with MAHA plug-in analogue input module card with 4 sensor inputs for temperature and pressure sensors or lambda sensors
- Optional connection of MAHA MGT 5, MDO 2 LON and MET SERIES emission testers
- Optional connection of Krupp/AIC fuel consumption measuring instruments for petrol- and diesel engines

MCD 2000 Communication Desk Description

- Robust and multifunctional metal encasement
- Integrated switch cabinet for housing electronic components
- Lockable drawer for keypad and PC mouse and storage compartment for small items of equipment
- VESA standard bracket for holding the all-in-one PC or PC monitor
- Can be extended with optional PC storage compartment or side shelves
- Varnished with high-quality powder coating: window grey, RAL 7040 (switch cabinet) anthracite grey, RAL 7016, (side faces)
