

PITFORCE

PIT JACK FOR CARS, COMMERCIAL, AGRICULTURAL AND SPECIAL VEHICLES

Flexible pit jack remote control for installation works and access from both sides of the pit

Floor running jacks set loads of approx. 1000 kg and upwards down on the ground automatically, so as to permanently guarantee underload

Suspended pit lifts with 750 mm hoisting path and quick, low-noise electric-hydraulic drive. Precision control included as standard; ideal for high-suspended vehicle sub-assemblies

Compressed-air drive during lowering in both telescopic levels decreases the time taken to lower to the base position, avoiding undesired collisions of the vehicle during lowering from the working pit thanks to the piston rod that always retracts

DISCHARGE SPINDLE WITH DEAD MAN'S CONTROL ENABLES PARTICULARLY DELICATE/PRECISE AND SECURE DISCHARGE OF THE PIT LIFT

The frames of the rail-guided pit lifts are width-adjustable and can therefore be universally adjusted to any standard working pit on a custom basis

The frames of suspended pit lifts are width-adjustable and can be used universally in the U-profile of any standard working pit without any on-site modification

A high-quality powder coating offers protection against aggressive liquids and adds to the high-quality aesthetic of the products
